

# Prevent falls before they happen with the Better Balance Evaluator and VRT Platform

## Better Balance Evaluator

- Quantitatively compare your patients with normative age-matched data.
- Light weight and portable
- Quick set-up
- Fast and accurate results
- Easy to follow testing protocols
- Normal and perturbed surfaces
- Eyes open and eyes closed tests

Advanced technology and high resolution ensures quality results. User-friendly, Windows® based software provides on-screen instructions to guide the test administrator through the testing protocols, including normal and perturbed surfaces. The Better Balance Evaluator is complete with laptop computer with an easy to read 15.4" screen and printer for a complete turnkey system.

## Better Balance Vestibular Rehab Training (VRT)

The Better Balance VRT is ideal for training – rehabilitation and physical therapy for all patients.

- Minimal assembly for immediate use
- Use of positive visual feedback on screen
- Built-in training protocols for maximum ease
- Design your own training protocols, for maximum flexibility
- Reported scores allow progress of rehabilitation to be monitored
- Integral software both for assessment and training

Training is paired with balance assessment for a powerful and complete all-in-one tool. The Better Balance VRT is complete with your choice of a PC computer with a 22" flat panel monitor or laptop computer with a 15.4" monitor and printer for a total turnkey system.
